EMC TEST REPORT

Applicant :	V-TAC EXPORTS LIMITED
Address :	FLAT/RM D-2 7/F WING CHEONG COMMERCIAL BLDG 19-25 JERVOIS STREET SHEUNG WAN HK
Manufacturer :	LEDXPRESS LIGHTING TECHNOLOGY CO.,LTD
Address :	Floor 1-6, Block E, No.10 Lefengsi Road, Henglan town, Zhongshan City, Guangdong Province, China
Factory :	LEDXPRESS LIGHTING TECHNOLOGY CO.,LTD
Address :	Floor 1-6, Block E, No.10 Lefengsi Road, Henglan town, Zhongshan City, Guangdong Province, China
This document includes : 42 pages	

Product :	Lithium Ion Batteries	
Model name :	VT-12040-1, VT-10240W, VT-10240B, VT-10240B-1	
Trade mark :		
Rated voltage :	51.2Vdc	
Rated capacity :	200Ah, 10.24KWh	
Highest clock frequency :	≤108 MHz	
Protection class :	--	
Tests realised :	On one sample of VT-12040-1	
Test date :	Oct.11 to 14, 2024	
Standards used (date) :	EN IEC 61000-6-4:2019 EN IEC 61000-6-3:2021 EN IEC 61000-6-2:2019 EN IEC 61000-6-1:2019	
Clauses examined :	All Clauses Relevant.	

CONCLUSION :The sample does satisfy the clauses examined .

Test done by:	Approved by:
Name : Able ZHAO <i>Able ZHAO</i>	Name : Wen ZHU <i>Wen ZHU</i>
Date : Nov.7, 2024	Date : Nov.7, 2024

This report is governed by, and incorporates by reference, the Conditions of Testing as posted at the date of issuance of this report at <http://www.bureauveritas.com/home/about-us/our-business/cps/about-us/terms-conditions/> and is intended for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. Measurement uncertainty is only provided upon request for accredited tests. Statements of conformity are based on simple acceptance criteria without taking measurement uncertainty into account, unless otherwise requested in writing. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence or if you require measurement uncertainty; provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents.

TEST REPORT N°: CNDQ-ESH-P24100704B

1 Summary of test results

No.	Item	Result
Emission part:		
1	Continuous disturbances	N/A
2	Discontinuous disturbances	N/A
3	Radiated emission	PASS
4	Harmonic current emission	N/A
5	Voltage fluctuation and flicker	N/A
Immunity part:		
6	Electrostatic discharge	PASS
7	RF electromagnetic fields	PASS
8	Electrical fast transient/Burst	PASS
9	Surge	N/A
10	Injected current	N/A
11	Power frequency magnetic field	PASS
12	Voltage dips and short interruptions	N/A

TEST REPORT N°: CNDQ-ESH-P24100704B

2 General information of laboratory

2.1 Test facility

The tests done in this report are subcontracted to :

Laboratory name: KSiGN(Guangdong) Testing Co., Ltd.

Testing location: West Side of 1/F., Building C, Zone A, Fuyuan New Factory, Jiujiu Industrial Park, Minzhu, Shatou, Shajing, Bao'an District, Shenzhen, Guangdong, China (CNAS L13261)

2.2 Measurement uncertainty

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the EUT as specified in CISPR 16-4-2.

This uncertainty represents an expanded uncertainty expressed at approximately the 95% confidence level using a coverage factor of k=2.

This lab's measurement uncertainty U_{Lab}, is low than UC_{Cispr} , Table 1 – Values of UC_{Cispr} of CISPR 16-4-2, therefore compliance is deemed to occur if no measured disturbance exceeds the disturbance limit.

Measurement		Value
Disturbance voltage		3.16 dB
Radiated disturbance (3 m)	30 MHz ~200 MHz	4.51 dB
	200 MHz ~1000 MHz	5.01 dB
	1 GHz ~ 6 GHz	3.74 dB
	6 GHz ~ 18 GHz	3.66 dB

TEST REPORT N°: CNDQ-ESH-P24100704B

3 General product information

3.1 Specification of product

- Operating modes:
- Mode A: Charging mode.
 - Mode B: Discharging mode.
 - Mode C:

- Types of port:
- AC power port
 - DC power port
 - wired network port: LAN port for BMS
 - signal/control port
 - enclosure port

Special comments: All models are similar as each other except the mechanical components and color. So all EMC tests were performed on model VT-12040-1 without WIFI function, the test result is applicable to all models.

Rating label:

V-TAC
Meaningful Innovation.

Product	Lithium Ion Batteries
Product Model	VT-12040-1
SKU No.	11447-1
Nominal Voltage	51.2V
Rated Capacity	200Ah
Nominal Energy	10.24kWh
Operating Voltage Range	43.2V-58.4V
Max. Charge Current	100A@25°C
Max. Discharge Current	100A@25°C
Communication	CAN
Dimension(W*D*H)	458*265*805mm
Protection Level	IP20
Production date	2024.09

CAUTION:

- Do not disassemble or alter the battery in any way.
- Do not use the battery for purposes not described in its documentation.
- Do not drop, strike, puncture, or step on the battery.
- In case of electrolyte leakage, keep leaked electrolyte away from contact with eyes or skin, immediately clean with water and seek help from a doctor.
- Do not put the battery into a fire.
- Do not use it or leave it in a place near fire, heaters, or high temperature sources.
- Do not submerge the battery in water, or expose it to moisture.
- Do not allow the terminals to contact exposed wire or metal.
- The battery is heavy and can cause injury if not handled safely.
- Keep out of reach of children or animals.
- DISPOSAL OF BATTERIES SHOULD FOLLOW LOCAL REGULATIONS
IFP56/175/206[1P16S]M/-20+50/95

5.6 Radiated emission (above 1GHz)

5.6.1 Test condition

Applicable Standard:	EN IEC 61000-6-4:2019, EN IEC 61000-6-3:2021	
Test set up description:	<input type="checkbox"/>	Equipment on a table of 80 cm height
	<input type="checkbox"/>	Equipment on the floor (isolated from ground plane)
	<input type="checkbox"/>	Other:
Supplementary test set-up description for SAC :	Measurements were made in semi-anechoic chamber with RF absorber on the RGP which complies to CISPR 16. The EUT was rotated 360° about its azimuth with the receive antenna located at various heights in horizontal and vertical polarities. Final measurements with peak and average detector were then performed by rotating the EUT 360° and adjusting the receive antenna height from 1 to 4 m. All frequencies were investigated in both horizontal and vertical antenna polarity, where applicable.	
Test method applied (1000 MHz to 6000 MHz):	<input type="checkbox"/>	FSOATS with measurement distance [m]: 3 m
	<input type="checkbox"/>	OATS with measurement distance [m]: 3 m
	<input type="checkbox"/>	FAR with measurement distance [m]: 3 m
	<input type="checkbox"/>	SAC with measurement distance [m]: 3 m
Remark:	The highest operation frequency is below 108MHz.	

EN IEC 61000-6-4:2019 Limits for 3 m distance		
Frequency range (MHz)	Peak (dBµV/m)	Average (dBµV/m)
1000 – 3000	76	56
3000 – 6000	80	60

EN IEC 61000-6-3:2021 Limits for 3 m distance		
Frequency range (MHz)	Peak (dBµV/m)	Average (dBµV/m)
1000 – 3000	70	50
3000 – 6000	74	54

6 Test condition and results for immunity

6.1 General information

Performance criteria as defined by the standard EN IEC 61000-6-2:2019, EN IEC 61000-6-1:2019	
Criterion	Description from standard
A	The EUT shall continue to operate as intended during and after the test. No degradation of performance or loss of function is allowed below a performance level specified by the manufacturer, when the EUT is used as intended. If the performance level is not specified by the manufacturer, this may be derived from the product description and documentation and what the user may reasonably expect from the equipment if used as intended.
B	The EUT shall continue to operate as intended after the test. No degradation of performance or loss of function is allowed below a performance level specified by the manufacturer, when the EUT is used as intended. The performance level may be replaced by a permissible loss of performance. However, during the test degradation of performance is allowed but no change of actual operating state or stored data is allowed. If the minimum performance level or the permissible performance loss is not specified by the manufacturer, either of these may be derived from the product description and documentation and what the user may reasonably expect from the equipment if used as intended.
C	Temporary loss of function is allowed during the test, provided the function is self-recoverable or can be restored by the operation of the controls.

TEST REPORT N°: CNDQ-ESH-P24100704B

6.2 Electrostatic discharge immunity test (ESD)

6.2.1 Test condition

Basic standard:	IEC 61000-4-2:2008 / EN 61000-4-2:2009	
Test set up:	<input type="checkbox"/>	Table-top equipment
	<input type="checkbox"/>	Floor standing equipment
	<input checked="" type="checkbox"/>	Wall or ceiling mounted equipment (Treated as table top)
Supplementary test set up description:	Measurements were made on a ground plane that extends 0.5 m minimum beyond all sides of the system under test and the minimum distance between the equipment under test and any laboratory walls or any other metallic surfaces shall be at least 1 m. Air discharges were applied to non-metallic parts of the system. Contact discharges were applied to all accessible metallic parts. Discharges were also applied to the Horizontal and Vertical Coupling Planes, where applicable.	
Discharge impedance:	330 ohm / 150 pF	
Size of horizontal coupling plate:	1.6 x 0.8 m	
Size of vertical coupling plate:	0.5 x 0.5 m	
Number of discharges for each test point:	10	
Discharge interval:	1 s	
Performance criterion:	B	
Remark:	--	

TEST REPORT N°: CNDQ-ESH-P24100704B

6.2.2 Test results

Operating mode:	Mode A and Mode B

6.3 Radiated, Radio-frequency, Electromagnetic field immunity test (RS)

6.3.1 Test condition

Basic standard:	IEC 61000-4-3:2020 / EN IEC 61000-4-3:2020	
Test setup:	<input checked="" type="checkbox"/>	Table-top equipment
	<input type="checkbox"/>	Floor standing equipment
	<input type="checkbox"/>	Other: --
Supplementary test set up description:	Measurements were made in a semi or full anechoic chamber or TEM or reverberation chamber and the indicated field strength was pre-calibrated prior to placement of the system under test. For semi or full anechoic chamber the tests were performed in both the horizontal and vertical polarities, where applicable. The antenna was placed between 1 and 3 m from the product under test.	
Antenna height:	1.5 m	
Distance antenna to EUT:	3 m	
Modulation:	80 % AM with 1 kHz	
Dwell time:	3 s	
Step size:	1%	
Applied testing method:	<input checked="" type="checkbox"/>	IEC 61000-4-3 Radiated Field with Antenna
	<input type="checkbox"/>	IEC 61000-4-22 Radiated emission and immunity measurements in fully anechoic rooms (FARs)
	<input type="checkbox"/>	IEC 61000-4-20 Emission and immunity testing in transverse electromagnetic (TEM) waveguides
Performance criterion:	A	
Remark:	--

6.4 Electrical fast transient/Burst immunity test (EFT)

6.4.1 Test condition

Basic standard:	IEC 61000-4-4:2012 / EN 61000-4-4:2012	
Test setup:	<input checked="" type="checkbox"/>	Table-top equipment
	<input type="checkbox"/>	Floor standing equipment
	<input type="checkbox"/>	Artificial hand applied
Supplementary test set up description:	<p>The ground reference plane shall project beyond the EUT by at least 0.1 m on all sides. The minimum distance between the EUT and all other conductive structures (including the generator, AE and the walls of a shielded room), except the ground reference plane, shall be more than 0.5 m. All cables to the EUT shall be placed on the insulation support 0.1 m above the ground reference plane. Cables not subject to test shall be routed as far as possible from the cable under test to minimize the coupling between the cables.</p> <p>Either a direct coupling network or a capacitive clamp shall be used for the application of the test voltages.</p>	
Test time:	1 min	
Repetition frequency:	5 kHz	
Impulse wave shape:	5/50 ns	
Burst duration:	15 ms for 5kHz repetition frequency	
Burst period:	300 ms	
Performance criterion:	B	
Remark:	The total length of the cable which connected to LAN port for BMS does not exceed 3 m according to the manufacturer's functional specification.	

LCIE

6.5 Surges

6.5.1 Test condition

Basic Standard:	IEC 61000-4-5:2014+A1:2017 / EN 61000-4-5:2014+A1:2017
Test set up description:	Floor standing equipment set-up (10 cm over ground plane)
Supplementary test set up description:	Tests were conducted with the product connected to a Coupling/Decoupling Network (CDN)
Wave-Shape:	1.2/50 μ s open circuit voltage, 8/20 μ s short circuit current
Repetition rate:	60 s
Number of pulses for each coupling:	5 positive and 5 negative
Performance criterion:	B
Remark:	The total length of the cable which connected to LAN port for BMS and DC power port does not exceed 3 m and the cable is inside a building according to the manufacturer's functional specification.

6.5.2 Test results

TEST REPORT N°: CNDQ-ESH-P24100704B

6.6 Immunity to conducted disturbances induced by RF fields (CS), 0.15 MHz to 80 MHz

6.6.1 Test condition

Basic Standard:	IEC 61000-4-6:2013 / EN 61000-4-6:2014	
Test setup:	<input type="checkbox"/>	Equipment located (0,1 ± 0,05) m above ground plane
	<input type="checkbox"/>	Elevated ground plane.
	<input type="checkbox"/>	Artificial hand applied.
Supplementary test set up description:	Measurements were made on a ground plane that extends 0.5 m minimum beyond all sides of the system under test. The EUT was located 0.1 m above the reference ground plane and any associated cables attached to the EUT were located between 30 - 50mm above the ground plane. The indicated field was pre-calibrated prior to placement of the system under test.	
Modulation:	80 % AM with 1 kHz	
Dwell time:	3 s	
Step size:	1%	
Performance criterion:	A	
Remark:	The total length of the cable which connected to LAN port for BMS and DC power port does not exceed 3 m and the cable is inside a building according to the manufacturer's functional specification.
